PhD, Neuroscience Research

Institute of Psychology, Psychiatry and Neuroscience - King's College London

- Project: *"Linking blood metabolites to early dementia using systems biology"*, Supervisors: Dr Petroula Proitsi & Professor Marcus Richards. Funders: NIHR Biomedical Research Centre PhD studentship
- Utilising network, pathway, and metabolome-wide approaches to highlight key metabolites influencing early markers of dementia - including imaging, blood, and cognition measures - in large cohort studies. Teasing apart the involvement of risk factors across the life course. Using statistical genetics approaches, such as Mendelian randomisation and polygenic scores, to further understand the nature of these relationships.
